Analysis of Proposed Rules

1. Statutes Interpreted.

Chapters 101 and 145, Stats., and 2005 Wisconsin Act 25

2. Statutory Authority.

Chapters 101 and 145, Stats., and 2005 Wisconsin Act 25

3. Related Statute or Rule.

None.

4. Explanation of Agency Authority.

Chapter 101, Stats., authorizes the Department of Commerce to adopt reasonable and proper rules relative to the exercise of its powers and authorities, including the issuance and renewal of various credentials to businesses and individuals. Chapter 145, Stats., grants the Department authority to promulgate rules governing plumbers and automatic fire sprinkler system installers. 2005 Wisconsin Act 25 contains revisions to the credential terms for plumbers and automatic fire sprinkler system installers.

5. Summary of Proposed Rules.

Chapter Comm 5 of the Wisconsin Administrative Code contains the Department's rules for the issuance and renewal of numerous credentials which businesses and individuals are either mandated or permitted to obtain. These credentials are licenses, certifications and registrations that relate to activities associated with the construction and inspection of buildings and structures or specific components and elements that serve buildings and structures.

The proposed rules consist of revisions in chapter Comm 5 in order to address some administrative issues that have occurred since the last update of chapter Comm 5. The definition of HVAC equipment and an exception for obtaining the HVAC contractor registration are being revised in order to clarify who must obtain the registration. The credential terms for automatic fire sprinkler system installers and plumbers are changed to 4 years. The respective credential fees and any required continuing education hours are adjusted accordingly. The experience requirements for qualifying for the examination for the commercial electrical inspector certification are removed. The proposed rules also include the creation of continuing education requirements for the renewal of the license as a utility contractor. The proposal also removes dates and date-dependent requirements which are no longer relevant.

6. Summary of, and Comparison with, Existing or Proposed Federal Regulations.

The proposed rules address administrative issues unique to the department's rules. There are no existing or proposed federal regulations that address the activities to be regulated by the proposed rules.

7. Comparison with Rules in Adjacent States.

The proposed rules address administrative issues unique to the department's rules. There are no similar rules in the states of Illinois, Iowa, Michigan and Minnesota.

8. Summary of Factual Data and Analytical Methodologies.

There were no factual data or analytical methodologies used to develop the proposed rules.

9. Analysis and Supporting Documents Used to Determine Effect on Small Business or in Preparation of Economic Impact Report.

The proposed rules should have a minimal effect on small business. There were no supporting documents used to determine the effect on small business, and an economic impact report was not prepared.
